Preprints

2023   Hjelle, E. O., **Jaburi, L.**, Knak, R., Lee, H., & Wang, S. (2023). *Functions on Irreducible Components of the Emerton-Gee Stack.* arXiv preprint arXiv:2306.00141. *All authors contributed equally

Education

2020-2023   **PhD in Pure Mathematics**, *Imperial College*, London, *(Expected 02/2024)*
Supervisor: Ana Caraiani, Title: *The p-adic geometry of the μ-ordinary locus; Functions on the Emerton-Gee stack*

2017-2019   **M.Sc. in Mathematics**, *University of Bonn*
Supervisor: Peter Scholze, Title: *Shimura data in terms of $B(G, \mathbb{R})$*

2017-2019   **B.Sc. in Mathematics**, *University of Freiburg*

Research Experience

2020-2023   Worked on two projects in the Langlands program, an overarching framework conjecturing deep connections between a wide variety of different mathematical fields, under supervision of Ana Caraiani; discovered novel results both independently and in collaboration

2018-2019   Wrote Master thesis under supervision of Fields Medal winner Peter Scholze

Honors and Awards

2020-2023   Selected PhD candidate for Royal Society scholarship

2014-2019   National scholarship and extracurricular (honors) program at the *Stiftung der Deutschen Wirtschaft*

Work Experience

2023   Journalist for Imperial College magazine Felix; reviewed theater plays

2017   Gave tutorial for the grad course *Algebraische Topologie*, University of Freiburg

2016-2017   Gave tutorial for the undegrad course *Algebra und Zahlentheorie*, University of Freiburg

Events (selection)

11/2023	Oxford conference: Developmental Interpretability
09/2023	Amsterdam retreat: Machine Learning, Singularity Theory and Phase Transitions
03/2023	Organized an arithmetic algebraic geometry mini-conference for ∼40 master and PhD students

Languages

German (native), Neo-Assyrian Aramaic (native), English (fluent), Arabic (intermediate), Dutch (intermediate)

Technical skills

Python, PyTorch, LaTeX, Git
